

We have outstanding projects! ,and we are looking for partners to make them happen!

Co-founded by six experts in optics and mechanics, MAAGM is dedicated to using the science of light to provide scientific instruments for Earth sciences. Our cutting-edge technology, developed in collaboration with renowned laboratories, places optics at the heart of measurement devices that explore the planet — and not just the Earth.

In a near future, we will be looking for diverse profiles and skill sets. However, across all roles, we share a common vision for a good team integration : **we are looking for open scientists and true companions who:**

- Loves science for its ability to uncover new territories 🌐🔬,
- Has built or taken apart many things just for fun 🔧🔨,
- Would rather face a mountain pass than stroll downhill 🏔️🚶,
- Dreams that their expertise in electronics and/or optics could benefit something better than a missile or a connected coffee machine 🚀☕,
- And who finds space, volcanoes, and earthquakes far more energizing than three cups of coffee in the morning 🌋🌍

Be the first to apply, even before our job openings are published !

Indeed, our will is actually to build the job position according to people we want to bring aboard, rather than the contrary. This is why your spontaneous applications are so important for us.

Upcoming opportunities are :

- Embedded Electronics Engineer
- Instrumentation Engineer (mechanical development, metrology, characterization, industrialization)
- Geoscientific Engineer (with experience in instrument development and/or testing)
- Late 2026 : R&D technician in Optic or Electronics or Metrology
- Post doctoral position are possible for those with a PhD willing to test the start-up before applying for a long-term position (through our partnerships with IPGP, LTE and ESEO)
- CIFRE PhD positions in Instrumentation, Electronics, and Optics (located in Angers, Paris, or Le Mans)
- Various internship positions M1 or M2

Aside from CIFRE PhD roles, all our positions can be part-time (from 20% to 100%). **Your time is yours.** You are free to choose the workload that suits you best.

Application :

Frédéric Guattari – CEO MAAGM – frederic.guattari@maagm.com

CV are welcomed (and will be needed in the end), but it is ok to start with a quick phone chat if you prefer. Just set a timeslot by text message first at +33 6 64 30 39 94
